## SUMMARY

Computer Science graduate from FAST-NUCES with hands-on experience building production mobile and web applications. Currently working as a Flutter and Full Stack Developer, contributing to real-world products across healthcare, enterprise, and startup environments. Known for adaptability, fast learning, and strong cross-stack collaboration..

## Experience

**Veroke**                                                                                                                **On-site**

*Jr. Flutter Developer*                                                                                      Nov'24 - Present

- **Flutter Developer (Aug 2025 – Present)**
  Flutter, APIs, State Management, Firebase / Backend Integration

- **QA Engineer (May 2025 – Jul 2025)**
  Manual Testing

- **Salesforce Developer (Jan 2025 – May 2025)**
  Apex, SOQL, LWC, Integrations

- **ServiceNow Intern (Nov 2024 – Dec 2024)**
  ITSM, Scripting, Platform Basics

**SRS Digital**                                                                                        **Remote (Part Time)**

*Full Stack Web and Mobile Developer*                                                          Jun '25 - Present

- **Technologies: React.js, Flutter , Node.js, Express, TypeScript, Tailwind CSS, PostgreSQL, Digital Ocean**

**Mugutech**                                                                                                               **Remote**

*Web Development Intern*                                                                        June '24 - August '24

- **Technologies: React.js, Express, Node, MySQL, Figma, Wordpress, Tailwind, Shadcn**
- **Certificate of Completion**, **Letter of Recommendation**

## EDUCATION

**FAST NUCES**                                                                                         **Islamabad, Federal**

*Bachelor of Science in Computer Science*                                                            2020-2024

## Projects GitHub

**Wareed Labs***:*

- **Project Description:** Wareed Labs is a patient-facing mobile application for a medical laboratory service that allows users to access lab services digitally. The app enables patients to view and book laboratory tests, manage appointments and services, and interact with lab offerings through a centralized mobile platform.
- **Role:** Worked on implementing key features, building multiple UI screens as part of a design revamp, and ensuring feature parity with the existing production app
- **Tech Stack:** Flutter

**MyResale***:*

- **Project Description:** MyResale is a web-based SaaS platform designed to solve the entire backend operational complexity for Indonesian social commerce sellers.

- **Role:** Worked as a supporting developer during the web platform development, where I independently implemented assigned frontend and backend modules, including core features such as chat and cart functionality. In parallel, took ownership of developing the mobile application using Flutter, designing and implementing a significant portion of the app's UI and core flows.
- **Tech Stack:** Vite, React.js, Flutter , Node.js, Express, PostgreSQL, TypeScript, Tailwind, Tailwind CSS, Digital Ocean

**Klaimr*:***
- **Project Description:** Klaimr is a strategic tool built for Indonesian solopreneurs and small businesses who use TikTok Live to sell goods. It addresses the core challenge of tracking "who claimed what first" in a flood of comments, replacing unreliable methods like notebooks or manual scrolling
- **Role:** Working as the sole Full Stack Lead Developer for this project in a startup environment.
- **Tech Stack:** Vite, React.js, Node.js, Express, PostgreSQL, TypeScript, Tailwind, Tailwind CSS, Digital Ocean

## SKILLS, ACTIVITIES & INTERESTS

**Skills:** JavaScript, Flutter, TypeScript, Flutter, React.js, Node.js, Express.js, SQL, PostgreSQL, GitHub, Salesforce (Apex, SOQL), Tailwind CSS, Figma
**Languages:** Urdu (Native), English (Fluent)
**Interests:** Cryptocurrency and financial markets
